

**A****B**

1. Metabolism of cofactors and vitamins
2. Pyruvate metabolism
3. Propanoate metabolism
4. RNA transport
5. Glycolysis / Gluconeogenesis
6. RNA degradation
7. Chaperones and folding catalysts
8. Microbial metabolism in diverse environments

Mock-infected  
*C. difficile*-infected

Streptomycin-pretreated  
 Cefoperazone-pretreated  
 Clindamycin-pretreated
