

C**A****B**

- A. Metabolism of cofactors and vitamins
- B. Pyruvate metabolism
- C. Propanoate metabolism
- D. RNA transport
- E. Glycolysis / Gluconeogenesis
- F. RNA degradation
- G. Chaperones and folding catalysts
- H. Microbial metabolism in diverse environments

D

- Streptomyces-pretreated
- Cefoperazone-pretreated
- Clindamycin-pretreated

- C. difficile*
- Mock-infected
