

1. Metabolism of cofactors and vitamins
2. Pyruvate metabolism
3. Propanoate metabolism
4. RNA transport
5. Glycolysis / Gluconeogenesis
6. RNA degradation
7. Chaperones and folding catalysts
8. Microbial metabolism in diverse environments

■ *C. difficile*  
▨ Mock-infected

■ Streptomycin-pretreated  
■ Cefoperazone-pretreated  
■ Clindamycin-pretreated
