

1. Metabolism of cofactors and vitamins
2. Pyruvate metabolism
3. Propanoate metabolism
4. RNA transport
5. Glycolysis / Gluconeogenesis
6. RNA degradation
7. Chaperones and folding catalysts
8. Microbial metabolism in diverse environments

■ *C. difficile*
 ▨ Mock-infected

■ Streptomycin-pretreated
 ■ Cefoperazone-pretreated
 ■ Clindamycin-pretreated
