

A. Metabolism of cofactors and vitamins  
 B. Pyruvate metabolism  
 C. Propanoate metabolism  
 D. RNA transport  
 E. Glycolysis / Gluconeogenesis  
 F. RNA degradation  
 G. Chaperones and folding catalysts  
 H. Microbial metabolism in diverse environments

■ *C. difficile*  
 ▨ Mock-infected

■ Streptomycin-pretreated  
 ■ Cefoperazone-pretreated  
 ■ Clindamycin-pretreated
